**NCR**

CORPORATE

Your IT solution

## NCR ANGOLA

NCR began by developing its activities in two main areas: a computer equipment sales division and a corporate division dedicated to companies.

The public sales division focused on retail within the domestic market while the corporate division focused on small, medium and large enterprises and the public sector.

## NCR CORPORATE

The NCR Corporate business unit aims to provide companies and organizations an additional set of ITSM solutions (IT Services Management) through its services, following to ITIL best practices. Our aim is to focus entirely on our clients' business models through doing what we do best: managing and maintaining information systems. NCR Corporate uses new and proven technology designed to optimize your IT equipment, centralize control and reduce IT costs. Companies and organizations can count on direct and personalized contact through a Consultant and an Account Manager.
